

# Lutheran Braille Workers

\$100,000

*Plate  
Embossing  
Device*

LWML shows God's love to those needing Bibles and Christian materials printed in Braille by providing Lutheran Braille Workers (LBW) with a new Plate Embossing Device to replace worn out zinc plates and create new ones for producing these materials for use by people in the United States and worldwide.

*The New Plate Embossing Device (PED) will enable Lutheran Braille Workers to continue its mission to produce the Word of God in Braille.*

*We pray together...*

Oh God of Light and Life, many sightless men and women not only live in physical darkness, but they also do not yet see You with the eyes of faith. Bless LBW as they use the new Plate Embossing Device provided by this grant to help in the production of Bibles and other Christian materials in Braille. May the angels rejoice as many more souls are brought to the light of eternal life through reading these Braille materials. In Jesus' name we pray. Amen.
