

Children's Nutrition and Care

Vietnam

\$72,255

LWML shows God's love to children and adults in Vietnam by working with government agencies to help wipe out malnutrition, and also by providing instruction in English to students at the new International School in Hanoi, built and staffed by LCMS World Mission under permission recently granted by the Vietnamese government.

The children at the Early Childhood Centers usually have a small bowl of rice, vegetables, and fish or meat. This may be the only nutritious meal some of them receive each day.

Children are the same around the world. They love to have fun, try new things, meet new people . . . and pose for pictures! These are some of the schoolchildren who participate in LCMS World Mission programs.

We pray together...

Dear Almighty God, You have opened the doors of the Vietnamese nation to Your love by allowing LCMS World Mission personnel to teach good farming, fishing and better nutrition methods to rural Vietnamese. Now You have continued to bless the people of Vietnam by moving the Vietnamese government to allow an International School to be built and staffed by LCMS personnel in Hanoi. Bless all who teach and learn in this school. May many more precious souls come to know and trust You as their Lord and Savior. In Jesus' name we pray. Amen.
