

# The Lutheran Malaria Initiative

\$100,000

*Kenya, East Africa*

LWML shows God's love to people in Kenya, East Africa, who are in danger of contracting malaria through mosquito bites. This grant will support the Lutheran cooperative effort working with Word and Sacrament ministries to educate health care providers, treat the most vulnerable, especially children and pregnant women, and thereby support Kenya's initiative to eradicate malaria.

*Teaching children how to prevent malaria and how to recognize its symptoms helps the entire family when they share their new knowledge with parents and siblings.*

*LCMS and LWR program staff join our African Lutheran church partners in ministry to the entire person, extending Christ's hands to those in need.*

*We pray together...*

*Creator God, You have given us a marvelous world in which to live and raise our children. But often we do not understand why one creature causes such havoc in this fallen world. We lift up all those who suffer from malaria as a result of the mosquito bites they endure. Please bless this grant to enable the Lutheran Malaria Initiative to assist Kenyan Lutheran churches to educate health care providers in East Africa, as they provide care for all, especially children and pregnant mothers who are most vulnerable. Help Your servants eradicate this life-threatening disease. Bring many to faith in the Good News of salvation that they may receive eternal life through Your Son Jesus Christ, in Whose name we pray. Amen.*
