# Children's Developmental Disabilities Group Home and Rehabilitation Center

*Dominican Republic*

LWML shows God's love to children with developmental disabilities in the Dominican Republic by constructing a group home and rehabilitation center where children and their families can receive the spiritual and physical care and training they so desperately need.

*Dr. Marisol, director of HLBP, gives rehabilitation to Rosie who has Down's Syndrome. Rosie is learning to walk and eat by herself with the help of her grandmother, who Marisol trains. Marisol also shares a Bible story with Rosie's friends and family.*

*Below: There are no toys to play with, no chairs to sit on, and nothing to do all day long, but Dominican Lutherans visit the children, hold them, and play with them. This grant will help provide these types of activities for children and youth with developmental disabilities through the building and staffing of a group home and rehabilitation center.*

*We pray together...*

*Dear Father in Heaven, the children with intellectual and developmental disabilities in the Dominican Republic often face life with no educational or recreational opportunities, deprived of proper physical and spiritual care. Their families do not receive training or support to care for these special children who are often abandoned. But in Your mercy You have raised up Good Shepherd Lutheran Homes that now seeks to build a group home and rehabilitative center to provide the educational, recreational, spiritual and physical support these children need, along with training for their parents. Bless this grant with heartfelt funding so that this project becomes a reality for these dear children and their families. In Jesus' name we pray. Amen.*
